

Ice Flaker Machine Specification:

Item	Make	Model
Ice flakes maker with compatible power back up and compatible voltage stabilizer	BR Biochem	BTIF50

- ❖ Automatic ice-flake making machine
- ❖ Granular snow ice, designed for the laboratory
- ❖ Stainless steel 304grade body to ensure long life, anti-corrosion and durable, compact and simple, space-saving.
- ❖ Production capacity in 24hrs should be within 50-60 Kilograms.
- ❖ Storage capacity of the bin should be within 12-17 Kilograms.
- ❖ Fully insulated bin to ensure minimal loss of cooling and low power consumption
- ❖ Automatic stop and start when there is full/no water or power supply
- ❖ Designed for a noiseless operation

It should have energy efficient compressor.
